Page 18, line 1, change "diver" to --driver--.

IN THE CLAIMS

Please cancel Claims 10-12 without prejudice.

Please amend Claims 1-3, 6, 7, 13-15 and 17-19 as
follows (unamended claims under consideration also have been
listed without any parenthetical indication):

1. (Amended) A circuit connection structure,
comprising: a first substrate forming a display panel having
electrode terminals formed thereon, a semiconductor device
having first electrodes and second electrodes with the first
electrodes directly connected to the electrode terminals of
the first substrate, a flexible wiring member disposed in a
lateral position with respect to the first substrate having
